

It can be applied to  
puppies, kittens,  
pregnant and  
lactating female  
dogs or cats

## FIPRON 67 mg spot-on solution for dogs S

### COMPOSITION

One tube (0.67 ml) contains  
fipronil 67 mg  
Spot-on solution.  
Clear, yellow to yellow-green  
solution.

### TARGET SPECIES

Dogs.

### INDICATION

Treatment and prevention of flea  
infestation (*Ctenocephalides* spp.)  
and related flea allergy dermatitis  
(FAD) in dogs. Treatment and  
prevention of infestation by ticks  
(*Rhipicephalus* spp.,  
*Dermacentor* spp., *Ixodes* spp.)  
and lice (*Trichodectes canis*) in  
dogs.

### DOSAGE

For lack of data the minimum  
time between two applications  
is 4 weeks.

Method of administration:  
spot-on use.

Dosage depends on the weight  
of animal.

Dogs weighing 2–10 kg:  
the contents of one tube  
of 0.67 ml (S).

This ensures a minimum  
recommended dose of fipronil  
of 6.7 mg/kg bw.  
Monthly treatment is  
recommended in case of a high  
risk of repeated attacks by fleas,  
if the dog is allergic to flea bites,  
in case of necessary control of  
tick infestation, or at frequent  
bathing of the dog using  
hypoallergenic or moisturizing  
shampoos. In areas where there  
is no serious infestation by fleas  
and ticks, FIPRON spot-on for  
dogs can be applied every two to  
three months.

FIPRON spot-on for dogs is  
effective against flea infestation  
for approximately two months  
and against ticks for up to  
1 month, depending on the  
strength of environmental  
contamination. Fleas are killed  
within 24 hours after infestation.

### SHELF LIFE

24 months, use immediately after  
opening the bag.

### STORAGE

This veterinary medicinal product  
does not require any special  
temperature storage conditions.  
Store in the original container  
in order to protect from light.  
Store in a dry place.

### PACKAGE

1, 3 or 25 single-dose tubes.
